Core Competencies

Custom Software Development: Full-stack development with PHP (Laravel, Drupal), Python, JavaScript, and MySQL for both public and private sector projects.

Cloud Infrastructure & DevOps: Scalable cloud design and deployment using AWS (EC2, S3, Elastic Beanstalk), Docker, CI/CD pipelines, and Git Ops practices.

Data Engineering & Analytics: Data modeling, back-testing, and algorithmic analysis using Python and statistical tools.

Technical Leadership & Architecture: 12+ years leading architecture, code reviews, performance tuning, and strategy across distributed teams.

Project & Program Management: Experienced in Agile team leadership (onshore/offshore), managing lifecycles, budgets, and stakeholder communication.

Government Contracting Experience: Systems modernization and secure software development for the Department of the Interior and other federal clients.

Differentiators

Veteran Leadership: USMC Chief Warrant Officer (Ret.) with combat experience and previous Public Trust and Secret clearances.

CTO-Level Expertise: Technology vision-setting, team building, and executive alignment from multiple senior technical leadership roles

Experience

Bureau of Land Management: 2015 - 2020

Key Clients

Chad Humphrey, Principle, USMC CWO2 (ret)
